

Post-doctoral position (4 years):

A newly NIH-funded Immunology postdoctoral position is available immediately to investigate a novel vaccine adjuvant (Wang H, Lee T-J, Fites SJ, Merkhofer R, Zarnowski R, Brandhorst T, et al. (2017) Ligation of Dectin-2 with a novel microbial ligand promotes adjuvant activity for vaccination. PLoS Pathogens, 2017, 13 (8): e1006568. <https://doi.org/10.1371/journal.ppat.1006568>) for vaccination against fungi and other microbial pathogens that require cell mediated immunity for host protection.

The successful candidate will be highly motivated and experienced in cellular and molecular immunology. Experience in expression cloning in eukaryotic cells (*Pichia pastoris* and *S. cerevisiae*), glycobiology, pathogen recognition signaling pathways, T-cell biology and murine models of infectious diseases are desirable.

Applicants must have strong written and verbal skills in English.
